Subject Index

Activity
  activity and surface composition of sputter-deposited Pt/γ-Al_2O_3 catalysts, 65
Alloys
  effect of cerium implantation on the corrosion of Alloy 800H in an S–O–C environment, 103
  electrochemical and corrosion behaviour of BN-coated aluminium alloy surfaces, 47
  electrochemical study of multiple-energy nitrogen-ion-implanted aluminium alloys, 53
  improved high temperature oxidation behaviour of alloys by ion implantation, 79
  localized corrosion behavior of aluminum surface alloys produced by ion implantation and ion beam mixing, 41
Aluminium
  activity and surface composition of sputter-deposited Pt/γ-Al_2O_3 catalysts, 65
  anodic oxidation of nitrogen-implanted aluminium, 59
  electrochemical and corrosion behaviour of BN-coated aluminium alloy surfaces, 47
  electrochemical study of multiple-energy nitrogen-ion-implanted aluminium alloys, 53
  localized corrosion behavior of aluminum surface alloys produced by ion implantation and ion beam mixing, 41
  properties of oxide and nitride layers in aluminium produced by high dose ion implantation, 153
Argon
  argon ion beam effects upon photoemissive thin films, 161
  oxidation resistance studies of Ar^+- and N_2^+-implanted 304 stainless steel, 89
Austenite
  yttrium ion implantation into austenitic stainless steel: evidence for martensite formation, 97

Boron
  electrochemical and corrosion behaviour of BN-coated aluminium alloy surfaces, 47

Carbon
  effect of cerium implantation on the corrosion of Alloy 800H in an S–O–C environment, 103
  ion implantation in WC–Co: analysis of treated surfaces and testing of industrial tools, 183
Catalysts
  activity and surface composition of sputter-deposited Pt/γ-Al_2O_3 catalysts, 65
Cerium
  effect of cerium implantation on the corrosion of Alloy 800H in an S–O–C environment, 103
Chromium
  improvement in friction and wear of hard chromium layers by ion implantation, 177
Cobalt
  ion implantation in WC–Co: analysis of treated surfaces and testing of industrial tools, 183
Composition
  activity and surface composition of sputter-deposited Pt/γ-Al_2O_3 catalysts, 65
Copper
  effects of N_2^+ ion implantation on the oxidation of polycrystalline copper, 135
  surface oxidation of copper observed by perturbed angular correlation and Rutherford backscattering, 129
Corrosion
  corrosion studies in hot acids of titanium modified by refractory metals by ion beam techniques, 35
  effect of cerium implantation on the corrosion of Alloy 800H in an S–O–C environment, 103
  effect of ion implantation and ion beam mixing and their combined effect on aqueous corrosion resistance, 15
  electrochemical and corrosion behaviour of BN-coated aluminium alloy surfaces, 47
  ion-beam-assisted coatings for corrosion protection studies, 1
  localized corrosion behavior of aluminum surface alloys produced by ion implantation and ion beam mixing, 41
  relationship between corrosion properties and structures of titanium-deposited iron bombarded with ions at different target temperatures, 21
Current density
  high current density, broad beam ion implantation, 215

Dose
  properties of oxide and nitride layers in aluminium produced by high dose ion implantation, 153

Electrocatalytic properties
  electrocatalytic properties of ion-implanted oxide films, 71

Friction
  improvement in friction and wear of hard chromium layers by ion implantation, 177

Implanters
  newly developed linear ion implanter for industrial applications, 205
  universal high-current implanter for surface modification of materials, 193
Industrial applications
  ion beam processing for industrial applications, 167
  newly developed linear ion implanter for industrial applications, 205
Integrated circuits
  the current status of metallization in integrated circuit applications, 143
Ion beam mixing
  effect of ion implantation and ion beam mixing and their combined effect on aqueous corrosion resistance, 15
  localized corrosion behavior of aluminum surface alloys produced by ion implantation and ion beam mixing, 41
Ion implantation
  effect of ion implantation and ion beam mixing and their combined effect on aqueous corrosion resistance, 15
  effects of ion implantation upon nickel oxidation investigated by secondary ion mass spectrometry, 111

effects of N_2^+ ion implantation on the oxidation of polycrystalline copper, 135
high current density, broad beam ion implantation, 215
improved high temperature oxidation behaviour of alloys by ion implantation, 79
improvement in friction and wear of hard chromium layers by ion implantation, 177
ion implantation in WC–Co: analysis of treated surfaces and testing of industrial tools, 183
localized corrosion behavior of aluminum surface alloys produced by ion implantation and ion beam mixing, 41
plasma source ion implantation: a new approach to ion beam modification of materials, 197
properties of oxide and nitride layers in aluminium produced by high dose ion implantation, 153
yttrium ion implantation into austenitic stainless steel: evidence for martensite formation, 97

Iron
relationship between corrosion properties and structures of titanium-deposited iron bombarded with ions at different target temperatures, 21

Martensite
yttrium ion implantation into austenitic stainless steel: evidence for martensite formation, 97

Metal-ion beams
high-current metal-ion beams with energies up to 45 keV u^{-1}, 209

Metallization
the current status of metallization in integrated circuit applications, 143

Microwave ion source
improvement of a microwave ion source for surface modification, 221

Nickel
effect ion-implanted yttrium on the oxidation of nickel, 119
effects of ion implantation upon nickel oxidation investigated by secondary ion mass spectrometry, 111

Nitrogen
anodic oxidation of nitrogen-implanted aluminium, 59
effects of N_2^+ ion implantation on the oxidation of polycrystalline copper, 135
electrochemical and corrosion behaviour of BN-coated aluminium alloy surfaces, 47
electrochemical study of multiple-energy nitrogen-ion-implanted aluminium alloys, 53
oxidation resistance studies of Ar^+- and N_2^+-implanted 304 stainless steel, 89
properties of oxide and nitride layers in aluminium produced by high dose ion implantation, 153

Oxidation
anodic oxidation of nitrogen-implanted aluminium, 59
effect ion-implanted yttrium on the oxidation of nickel, 119
effects of ion implantation upon nickel oxidation investigated by secondary ion mass spectrometry, 111
effects of N_2^+ ion implantation on the oxidation of polycrystalline copper, 135
improved high temperature oxidation behaviour of alloys by ion implantation, 79
oxidation resistance studies of Ar^+- and N_2^+-implanted 304 stainless steel, 89
surface oxidation of copper observed by perturbed angular correlation and Rutherford backscattering, 129

Oxygen
activity and surface composition of sputter-deposited Pt/γ-Al_2O_3 catalysts, 65
effect of cerium implantation on the corrosion of Alloy 800H in an S–O–C environment, 103
electrocatalytic properties of ion-implanted oxide films, 71
properties of oxide and nitride layers in aluminium produced by high dose ion implantation, 153

Perturbed angular correlation
surface oxidation of copper observed by perturbed angular correlation and Rutherford backscattering, 129

Phosphorus
phosphorus implantation of 304L stainless steel, 27

Platinum
activity and surface composition of sputter-deposited $Pt/\gamma Al_2O_3$ catalysts, 65

Refractory metals
corrosion studies in hot acids of titanium modified by refractory metals by ion beam techniques, 35

Rutherford backscattering
surface oxidation of copper observed by perturbed angular correlation and Rutherford backscattering, 129

Secondary ion mass spectrometry
effects of ion implantation upon nickel oxidation investigated by secondary ion mass spectrometry, 111

Stainless steel
oxidation resistance studies of Ar^+- and N_2^+-implanted 304 stainless steel, 89
phosphorus implantation of 304L stainless steel, 27
yttrium ion implantation into austenitic stainless steel: evidence for martensite formation, 97

Sulphur
effect of cerium implantation on the corrosion of Alloy 800H in an S–O–C environment, 103

Temperature
improved high temperature oxidation behaviour of alloys by ion implantation, 79
relationship between corrosion properties and structures of titanium-deposited iron bombarded with ions at different target temperatures, 21

Thin films
argon ion beam effects upon photoemissive thin films, 161

Titanium
corrosion studies in hot acids of titanium modified by refractory metals by ion beam techniques, 35
relationship between corrosion properties and structures of titanium-deposited ion bombarded with ions at different target temperatures, 21

Tungsten
ion implantation in WC–Co: analysis of treated surfaces and testing of industrial tools, 183

Wear
improvement in friction and wear of hard chromium layers by ion implantation, 177

Yttrium
effect ion-implanted yttrium on the oxidation of nickel, 119
yttrium ion implantation into austenitic stainless steel: evidence for martensite formation, 97
